CAREER OBJECTIVE

To develop and maintain skills, becoming part of a good organization, which offers me **professional growth** while being resourceful, innovative, and challenging.

CAREER SUMMARY

- Having around **9+ years** of experience in the areas of analysis, design, and development.
- Experience in web-based applications development using **Java, J2EE** technologies.
- Comprehensive knowledge in implementation of MVC architecture with **Spring** and **Spring Boot** frameworks.
- Experience in persistence framework - **Hibernate ORM**.
- Experience in designing and developing **REST**-full style **Web Services** with Spring **OAuth2** authentication layer.
- Experience in implementing Single-Sign-On(**SSO**) authentications like Okta, Centrify, OneLogin.
- Experience in distributed memory caching systems like **Memcached, Redis**.
- Experience in Relational Database Systems like **MySQL**.
- Experience in logging the application using the **Log4J** framework.
- Good understanding of applications server - Apache **Tomcat**.
- Well exposed to **production environment** and production issues.
- Excellent analytical, debugging, and problem-solving skills.
- Good interpersonal skills, committed, result-oriented, smart working with a quest and **zeal to learn and adapt to new technologies**.
- Dedicated and highly ambitious to achieve organizational as well as personal goals.
- Ability to work in-group as well as independently with minimal supervision.

PROFESSIONAL EXPERIENCE

Currently working at **Salesforce.com Private Limited**, Hyderabad from **October 2021 to date**.

- **Designation:** Senior Member of Technical Staff **Functional Role:** Java/J2EE Developer
- **Profile:** Lead the development and implementation of web-based Java applications to support business requirements. Code assigned modules adhering to designs supporting internal business requirements or external customers. Standardize the quality assurance procedure for application. Oversee testing and develop fixes. Mentor team members.

Worked at **Reputation.com Private Limited**, Hyderabad from **November 2020 to October 2021**.

- **Designation:** Lead Software Engineer **Functional Role:** Java/J2EE Developer

Worked at **OpsRamp Private Limited** (transferred from NetEnrich Technologies Private Limited), Hyderabad from **November 2012 to November 2020**.

- **Designation:** Lead Product Developer **Functional Role:** Java/J2EE Developer

HIGHEST QUALIFICATION

- **B.Tech** in Information Technology from Vivekananda Institute of Technology and Science, Karimnagar (affiliated to **JNTU, Hyderabad**) in **June 2012** with **75.3%**.

TECHNICAL SKILL SET

Programming Languages	:	Java
Web Technologies	:	J2EE, JSP, JSTL, Servlets, Web Services, JQuery, JavaScript, AJAX, HTML, XML
Software Engineering	:	Requirement analysis, Architecture design, OO design, Database design
Persistence Framework	:	Hibernate
Frameworks	:	Spring, Spring Boot, Memcached, Redis, Elasticsearch
Databases	:	MySQL
Web Servers	:	Apache Tomcat
Development Tools	:	Eclipse
Build Technologies	:	Ant, Maven, Jenkins
Version Control	:	SVN, Git

PROJECTS

Project: Salesforce Quality Tools

Domain: Salesforce Internal Tool - Developers Productivity

Duration: Oct 2021 to date

Developers' Productivity tool kit ensures the quality of developer changes by integrating the Source Code Management to multiple quality pipelines and providing feedback accordingly.

Environment: Java /J2EE, Spring Boot, Rest APIs, PostgreSQL.

Project: R4E (Reputation for Enterprise)

Domain: Reputation Experience Management

Duration: Nov 2020 to Oct 2021

Reputation.com is a company delivering the Online Reputation Management (ORM) platform for large enterprises with multiple locations. The platform enables enterprises to monitor and manage their online ratings and reviews and respond to customer feedback in real-time. It aims to provide businesses with insights at the local level which help them be more efficient, deliver better service, and drive traffic, visits, and revenue.

Dealt Modules: Business Listings Management, Tenant Management.

Environment: Java /J2EE, Spring Boot, Rest Controllers, Redis.

Project: ITOM (IT Operations Management) – Micro Services

Domain: Remote Infrastructure, Partner Management, and ITSM

Duration: Nov 2019 to Nov 2020

This is the migration of existing ITOM monolithic projects into microservices. In a phased approach, we broke down the inter-module dependencies and built the components into multiple microservices.

Dealt Modules: Authentication & Authorization Micro Service, Auth Library for other microservices, API Throttling(Rate Limiting), SSO Authentications, Session Replications.

Environment: Java /J2EE, Spring Boot, Rest Controllers, Hibernate, Redis, MySQL, and Docker.

Project: ITOM (IT Operations Management)

Domain: Remote Infrastructure, Partner Management, and ITSM

Duration: Feb 2014 to Oct 2019

ITOM is cloud-based IT operation management and access platform. It provides a single pane of view and management experience of customers' infrastructure virtually available from anywhere in the globe. The built-in tools and monitoring integrations give the flexibility to monitor your infrastructure and preemptively notify you when your infrastructure reaches critical thresholds.

Dealt Modules: Auth Layer for Spring REST Services, API Throttling(Rate Limiting), SLA Engine, SSO Authentications, Knowledgebase Module, Email Parser, Custom Fields API, REST API Calls.

Environment: Java /J2EE, Spring, Web Services - REST, Hibernate, Memcached, Redis, JQuery, Elasticsearch, Quartz jobs, MySQL, and Cassandra.

Project: NetApp Project Management Portal

Domain: Project Management

Duration: Aug 2013 to Jan 2014

NetApp Project Management Portal is a tool of NetApp which keeps tracking the internal projects. It manages the complete cycle of a project. The portal gives an overview of tasks accomplished and simplifies the effort of project managers in analyzing the progress and statistics of a project concerning various parameters. A manager can create tasks, scheduled tasks, and recurring tasks based on the requirements of the project.

Dealt Modules: Project Work Flow Management, Task Management, Client Management.

Environment: Java/J2EE, Spring, Web Services, Hibernate, Memcached, JQuery, MySQL.

Project: IM Link (Ingram Micro Link)

Domain: Partner and Service Request Management

Duration: Dec 2012 to Jul 2013

IM Link is an online professional services network that makes it easier for Ingram Micro's channel partners in North America to collaborate and in-source technology services from a select community of IT service providers. Channel partners gain simple access to the specialized technical resources needed to fill any of the service needs of their customers by extending geographic and technical reach, adding flexibility for the management of their benches, and increasing profitability and revenue through the diversification of their product and service portfolios.

Dealt Modules: Partner Management, Service Request Management, Billing Module, Reports, Pre-Launch Emails, and Migration Module.

Environment: Java/J2EE, Spring, Web Services, Hibernate, Memcached, JQuery, Elasticsearch, Quartz jobs, FTP Utils and MySQL.
